

Editorial and Local.

The supreme court is grinding away at rather large grists.

It isn't slander that particularly injures people. It is the truth you tell about them.

New Mexico is looked upon over the East as the coming field for mining operations.

M. Levy, of Los Lunas has been arrested for impersonating an officer. Bail fixed at \$2,000.

A word in praise of your town and its advantages costs nothing and can do no harm. It may do a great deal of good.

The press, or a large portion of the animal, is extensively advertising editor Van Pelt, of Craig, Mo. He took Nimrod's pills.

Walters had a rain almost amounting to a cloudburst, Monday. During the downpour the water stood six inches deep over the ground.

Money produced at home should be spent at home as much as possible. To support every worthy home industry is to make a prosperous and successful community.

Everybody says Cerrillos should be a much better town than it is, and in this case everybody tells what is true. She will get out of the kinks some day, and then stand aside!

A good hotel business and \$1,500 worth of furniture for sale for \$800 cash. Business protected by Company. Good prospects ahead.—Excellent opening. Must be taken at once. Apply to this office.

The Santa Fe Sun remarks: "The Denver & Rio Grande could not make a better investment than to buy the Santa Fe Southern and extend its line from Santa Fe to Cerrillos and Albuquerque."

The cattle are looking well. Getting fat and sleek on the range grass. New Mexico is like Ben Hill said of Texas and hell. All that either needs to make a fine country is plenty of rain and good society.

The New Mexico Bar Association held its annual session in the supreme court room at Santa Fe, Tuesday. The old officers held over for another year. Routine business was transacted and an interesting address delivered by President Hazeldine.

Mr. J. S. Hazen, of the U. S. weather bureau, arrived this morning and will be attached to the weather office in this city. Mr. Hazen came from Fort Apache, A. T., and is much pleased with the change. His detail to this office is to allow Mr. Hersey more time to devote to the organization of the territorial weather service for New Mexico, which has just been ordered.—New Mexican.

The Alpha Gold Mining company has been incorporated under the laws of the territory of New Mexico; M. Slattery, R. G. McDonald, G. A. Rothgeb, incorporators; T. H. Everett, manager. Principal office, Las Vegas; base of operations, Santa Fe county. The above company has leased the Fiske mill at Dolores and are now making their first mill run. The machinery of the mill is said to be running nicely.

FOR SALE—This office has for sale from \$25,000 to \$30,000 worth of mining machinery, good as new, together with a frame building enclosing the same, costing \$1,200. The outfit consists in part, of a 200-horse boiler, an 85-horse engine, crusher, breaker, Gates Pulverizer costing \$4,000—eight concentrating tables, large iron tank, shafting, piping, wheelbarrows, shovels, drills and drill steel, etc. The whole outfit can be bought for \$5,000. A snap.

Fresh Meats!

I will have regularly on sale at Uptegrove's Grocery Store, fresh beef and other meats in season. My prices will be reasonable and will endeavor to give as good satisfaction as the resources of the surrounding country will render possible.

S. DAVIS.

The San Pedro mineral section has scarcely been prospected so far. There has been thousands of tons of mica made and shipped from the copper mountain, and the richness of the Lucky astonished the western mining world with its surface richness and bulk. Yet there is not today around San Pedro, a single shaft that has reached the 400-foot level. A country is not prospected in a mining sense, until the 1000-foot level has been explored. That this is a rich camp is proven by the bodies of ore found in first contact. The evidence of Gold in placer and quartz; the big copper mine worked for years; the discovery of lead and sand carbones carrying high in silver, together with the great iron caps, limestone contacts and broken rock, shows up enticingly to the prospector. Capital and proper directed effort will some day prove the camp's merit.

Fair Notes.

New Mexico producers should take great pride in making their one fair, held at Albuquerque in September, a great success. Its success means a good advertisement for the Territory.

Lovers of our National game will enjoy a treat as quite a series of games have been arranged for with clubs from Arizona and New Mexico with a chance for a game with the Denver Club. Should the latter club decide to come visitors will witness a great game of ball.

The Culinary department will be another new feature of the Fair this Fall. This department is under the charge of Miss Kate Forster, a young lady of considerable reputation as a culinary artist, and it is hoped that our lady friends who excel in this art will lend their assistance to make a fine display in this department this year.

The Hose contests this year promises to be unusually spirited. Reports received by the management indicate that quite a number of teams are already practising for the event and the prospects are that the contest for prizes will be very close. After the hose races and tests are made there will be a "tug of war" between picked men from all the Hose companies.

What a right royal time the little ones will have on Children's Day.

This is a feature never before introduced and the management have neglected nothing to make the day one long to be remembered by the children. Every variety of sport and games most pleasing have been arranged for and others will be added between now and Fair week.

The Territorial Fair Association offers \$100 for the best general collection of ores from New Mexico or Arizona. The collection must include gold, silver, copper, lead, iron, etc. For the second premium \$25 is offered; also \$50 for the best display of gold bearing rock from any one mining district—from not less than three mines in that district, and each sample to be not less than 25 pounds. Best collection of silver ores, same condition as above, \$50—best collection of copper ore, not less than 50 pound sample, \$30. Best display of lead ore from any one mining district, not less than 100-pound sample, \$30—same in iron, \$20. Anthracite coal, 500 pound sample, \$10—same for Bituminous coal.—Same for best 100-pound sample of coke.

For best samples of tin ore, manufactured brick, fire brick, building stone or marble, \$10 each is offered. The services of Gov. E. S. Stover, of Albuquerque, has been secured by the Association to superintend the Geological Department.
